

[Sign the petition here please.](#)

This is an urgent request that you join distinguished citizens of the world including Archbishop Desmond Tutu, other Nobel laureates and many others by signing our global petition to dismiss all charges against the Kings Bay Plowshares 7 (KBP7). They face 25 years in prison for exposing illegal and immoral nuclear weapons that threaten all life on Earth. The seven nonviolently and symbolically disarmed the Trident nuclear submarine base at Kings Bay, GA on April 4, 2018, the 50th anniversary of the assassination of Martin Luther King, Jr. (View KBP7 reading their statement [here](#).)

This petition is also a plea for us all to be involved in rebuilding the anti-nuclear weapons movement that helped disarm the world's nuclear arsenals from 90,000 down to 15,000 weapons in the 1980s. The KBP7 trial is expected to begin this spring in GA. Time is short. Please sign the petition and visit kingsbayplowshares7.org . Help KBP7 by forwarding their petition to your friends, to lists, and post it on social media.

The Kings Bay Plowshares 7 have offered us their prophetic witness. Now it's up to us!

In peace and solidarity,

The Kings Bay Plowshares 7 Support Committee
