

You're needed now to be part of a global outcry to close the Ramstein Air Base, the giant U.S. Air Force facility in Germany. Please join with people around the world to sign a just-launched petition urging closure of that key base for endless war -- now causing terror and carnage with drones and other airborne assaults in many countries.

Ramstein's crucial role in relaying signals for drone strikes "is binding the United States and Germany in an unconscionable program for extrajudicial killings," the petition says. And "Ramstein is also central to many other military aspects of the 'war on terror' that continues to have such profoundly negative consequences in many nations."
